

## Focus on your business—not your technology

Small businesses need technology to operate and compete—but the expertise and manpower required to support increasingly complex technologies are beyond the reach of many.

**That's where we come in.**

Lower IT cost

Increased staff productivity

Greater IT cost predictability

Stronger alignment of IT with business goals

Automation of ongoing maintenance

Proactive instead of reactive

Customized service levels to meet your company's IT requirements

## Save money—and headaches

The concept behind SkyPort IT's Managed Services is that we keep things running problem-free for a flat, monthly fee. Our services are proactive, rather than reactive—which means we minimize issues from the outset. We focus on maintaining computer health, rather than fixing machines that are broken.
